Databases:MongoDB,MySQL,PostgreSQL,Supabase,Firebase,Prisma

PROJECTS

Ai-Interview-Mocker | *Next.js,React.js,Drizzle ORM,Gemini AI API,clerk*
- This project was developed using Next.js with the help of Gemini AI Api and for database we have use drizzle ORM.
- This tool will help to generate the questions for the candidate based on the job profile they are preparing for.
- Learned about how to use Gemini AI API for fetching and generating questions and clerk library for authentication.

Content-generator for Saas App | *Next.js,Typescript,Clerk,Gemini AI API,,Drizzle ORM*
- This tool will generate Content for your Saas Apps such as blog writing,Caption for your Post,Spell checker etc.
- This tool helps to find your bug in the code can help you to understand the snippet of the code.
- Total credits Usage per person and payment Gateway is also included with th helpl of Razorpay api Key.

Identify the end receiver of a crypto transaction | *Python GUI,Solidity,D3.js,*Mixers and Tumblers
- This is a final year group project in this a software solution is developed to find the end receiver of a cryptocurrency transaction.
- It will directly transfer the amount to the receiver without any 3rd party interruption. It will also have live wallet surveillance where you can track your Dwallet.
- D3.js library enables the use of maps and graphs for checking a transaction highlight. Mixers and Tumblers are also used to uniquely identify the user's identity and prevent any anonymous interruption.

EXPERIENCE AND CERTIFICATIONS

TAXIAN | *(SDE Intern)*   Aug-Sept2024
Taxian is intially a start-up where I was offered the role of SDE intern and had developed and managed the UI of the System and also created the API Documentation with the help of Postman.

Microsoft Azure Fundamentals
Learned about the fundamentals of Microsoft Azure services,the cloud architect and storage solutions provided by them.

Microsoft AI Fundamentals
Learned about the basic fundamentals of AI and Gen AI and how to use them.
